Why the market was cautious

In CGI's favour

- Bookings C$4.53bn, book-to-bill 109.2%; US Federal 185%.
- Backlog C$32.07bn, 1.9× annual revenue; about C$12bn contracted for the next 12 months.
- Adjusted EPS C$2.31 (+8.5%); diluted EPS C$2.24 (+30.2%).
- Dividend raised 8.8%.

What the market discounted

- Constant-currency growth of 2.5% is almost all acquired.
- New-business bookings reportedly down more than 30%†; renewals carried the ratio.
- No numeric FY2027 outlook†.
- IFRS treats leases as debt and depreciation, which flatters EBITDA versus US GAAP peers.

AUTOMATIC LABEL	OPPORTUNITY SCORE	BUY UP TO	LAST CLOSE
Buy	7.27	C$162.14	C$116.81

The price is 28% below the Buy-up-to on the TSX line, so the label rests on quality and valuation, not momentum. The weak point is growth: if FY2026 is ingested with near-zero organic growth, the growth component (10%) falls. IFRS lease treatment is a known caveat in the quality inputs.

Automatic model label from the 13 Nov 2026 build, not an independently approved purchase recommendation. Analyst review status is shown separately on the scoreboard.
