Why the market rewarded it

What the market liked

- Adjusted EPS $1.91 vs $1.34 expected; net income $1.6bn.
- Production 1,427 Mboe/d, above the guidance midpoint (Permian, Rockies).
- Operating cash flow $4.1bn; free cash flow before working capital $2.8bn on $1.3bn capex.
- Principal debt down $1.8bn to $10.0bn; cash $3.9bn; two 8% dividend raises in 2026.

Caveats

- Realized oil $85.91/bbl, −11% q/q; O&G pretax income $2.6bn vs $2.8bn in Q2.
- GAAP EPS $1.61 includes derivative losses.
- Gulf of America volumes were curtailed.
- No 2027 capex guidance found†. OxyChem is gone (sold to Berkshire, Jan 2026), so results are now pure oil, gas and midstream.

Key figures

USD. Columns compare with the previous quarter because the OxyChem sale breaks the year-over-year comparison.

What management said

From published summaries of the release and call. The call transcript was not read in full for this report.

- CEO Richard Jackson and CFO Sunil Mathew presented the quarter.
- Debt reduction stays the priority; the next target is principal debt of about $6bn†.
- Production ran above the guidance midpoint on Permian and Rockies performance.

InvestorAce read

AUTOMATIC LABEL	OPPORTUNITY SCORE	BUY UP TO	LAST CLOSE
Hold Positive	6.92	$56.01	$56.90

The close is 1.6% above the Buy-up-to, so the label is Hold Positive and a small pullback or a higher score would flip it to Buy. Rules for commodity producers apply: a peak-price quarter does not substitute for multi-year valuation inputs, so this beat alone should not move the score much.

Automatic model label from the 13 Nov 2026 build, not an independently approved purchase recommendation. Analyst review status is shown separately on the scoreboard.
