BUY UP TO
$24.69

LAST CLOSE
$15.42

The model label is Buy with the price 38% below the Buy-up-to, while analysts' average target is below the price. That gap is the warning: the score uses trailing financials, and the Q4 guide says revenue is now falling about 11%. Expect the growth component to weaken when Q3 and the guide are ingested. The stock is still −60% this year.

Automatic model label from the 13 Nov 2026 build, not an independently approved purchase recommendation. Analyst review status is shown separately on the scoreboard.
